

## **SKILLS 4 LIFE**

This a video project for you to hand in the **15th May**.

### **First Task**

I would like you to answer the following questions:

1. Are you happy about using technology for study? Why/ Why not?
2. Do you feel prepared to use technology for study? Why/why not?
3. Which different devices do you use for study?
4. Which would you prefer to have only face-to-face classes, only online or a mix of both? why?

### **Second Task**

Invent a digital product that would make learning English easier.

Follow these steps:

- 1 Think of an idea – a technological breakthrough that would make it easier for people to learn English. Your idea could be serious or it could be closer to science fiction. Use your imagination!
- 2 Think about how your idea will work and how easy or difficult it will be to put the idea into practice.
- 3 Present your invention to a group of investors outlining your idea and asking for finance to start working on it. Try and convince them of its benefits. You can help the presentation with any tools you can think of, a poster a power point presentation, whatever is best for you!

The length of the video should be 3 to 5 min long.
